PROFILE SUMMARY

Full Stack MERN Engineer with 7+ months of production internship experience across two concurrent roles, a hackathon win, and independent projects shipped end-to-end. Consistent track record of owning features solo — REST API design, database schema, and React frontend delivery. Hands-on with LLM API integration and AI-assisted development. Final-year B.E. IT, Thane.

ACHIEVEMENTS

- 🏆 **1st Place – Drygate**, LovHack Season 2 — 4-stage analysis pipeline, SSE streaming, score 4.80/5.
- 🏆 **1st Place** – College Project Competition 2025 — Top rank among 11 teams.
- 🏆 **Grand Finalist** – VishwaNova 2026 — Qualified and presented Takaza at Grand Finale, MIT-WPU Pune.

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern – Fascave IT Solutions · Part-Time · Remote

Sep 2025 – Present

- Built a full Invoice Management System for a courier aggregator — admin and customer portals covering billing cycles, GST split logic (CGST/SGST/IGST), UTR-based clear requests, and approve/reject workflows; sole frontend developer.
- Led UI migration of 20+ pages from custom CSS to MUI Berry template — learnt MUI from scratch under a tight deadline, preserving all business logic across Dashboard, COD, Shipments, NDR, Orders, and Rate Calculator modules.
- Traced and fixed a stale-data bug in customer support chat — root cause was a disabled fetch flag suppressing live messages; fix restored real-time updates without a page refresh.
- Eliminated list screen load lag by pre-rendering table headers and skeletons before API response — perceived load dropped drastically vs. full-block render.

Tech: React, TypeScript, MUI, Node.js, Git/GitHub

Backend Engineer Intern – Raulo Enterprises · Part-Time · Remote

Sep 2025 – Dec 2025

- Built and deployed 3 production backend systems end-to-end as sole developer — no handoffs, no inherited code; 30+ REST API endpoints across all systems.
- Replaced raw image uploads with Sharp + WebP pipeline — 60% smaller files, 40% faster uploads.

Tech: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs

TECHNICAL PROJECTS

TAKAZA – MSME Payment Recovery Platform · [GitHub](#)

VishwaNova 2026 · Grand Finalist

- Architected 13 server-side API routes — PDF generation, SMTP email, Razorpay HMAC payment verification, GST/Udyam third-party lookups with mock fallbacks, and AI-generated legal notice body.
- 3-table Supabase schema with RLS policies, FK constraints, and updated_at trigger; service-role pattern isolates privileged writes from client calls.
- Compound interest calculator implementing MSMED Act Section 16 logic (3× RBI bank rate, monthly compounding) — Vitest test suite passing.

Tech: Next.js 14, TypeScript, Supabase, PostgreSQL, Razorpay, Nodemailer

EXAM MITRA – AI-Powered Exam SaaS · [Live](#) | [GitHub](#)

Live · Solo

- PDF-to-structured-JSON pipeline via LLM — extracts marks, metadata, and question patterns; cut manual data entry 90%. MongoDB indexing reduced paper retrieval from ~45s to under 50ms.
- Multi-mode answer generator with live resource fetching — surfaces 10+ sources per query, cutting research time 80%.

Tech: MERN Stack, Node.js, Express.js, MongoDB, LLM API Integration

DRYGATE – Workflow Production Readiness Verifier ·

LovHack S2 · 1st Place

- 4-stage pipeline (Parse → Static Analysis → Sandbox Execution → Remediation) producing a 0–100 score; real-time SSE streaming per stage; Prisma + PostgreSQL for audit history.

Tech: Next.js 14, TypeScript, Prisma, PostgreSQL, Docker, SSE

SKILLS

Backend: Node.js, Express.js, REST APIs, System Design, Python

Frontend: React.js, Next.js 14, TypeScript, Redux Toolkit, Tailwind CSS, MUI

Database: MongoDB, PostgreSQL, Redis

AI & Tools: LLM API Integration, Prompt Engineering, Cursor, Docker, Git/GitHub, Vercel

EDUCATION

B.E. in Information Technology · Shivajirao S. Jondhale College of Engineering (SSJCOE), Dombivli

2023 – 2026

Diploma in Computer Engineering · VPM's Polytechnic

2023 · 81%
